18 PTS TEXT SAMPLE

Music streaming on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless means.

12 PTS BODY COPY

Internet radio involves streaming media, presenting listeners with a continuous stream of audio that cannot be paused or replayed, much like traditional broadcast media; in this respect, it is distinct from on-demand file serving. Internet radio is also distinct from podcasting, which involves downloading rather than streaming.Many Internet radio services are associated with a corresponding traditional (terrestrial) radio station or radio network. Internet-only radio stations are independent of such associations.
